

AQUA ENERGY

HAND HELD ABRASIVE BLAST & COLD CUTTING

AQUA-SAW is an abrasive injection nozzle that permits the introduction of a large variety of abrasives into a high Pressure Water Stream. The resultant abrasive/water mixture can be used for a wide variety of applications ranging from paint removal to metal cutting.

With the addition of Abrasive Metering hopper, abrasives flow for coating removal can be controlled without damaging the softest or hardest substrates. This patented system offers many advantages and features over more conventional cleaning and cutting systems.

FEATURES:

- Max pressures to 40,600 psi (2,800bar)
- Stainless steel components
- Tungsten carbide inserts
- NPT or AE inlet connections
- Nozzle assembly - 0°, 15° or 30° Fan
- Abrasive Metering hopper
- Greater cleaning efficiency
- More cost effective
