3	Safety Shroud Adapter, 40K	1	77516029

Applications/Features:

Since the safety of the operator is the first consideration when water blasting, the **Aqua Energy Safety Shroud** is designed to protect the operator from dangerous hose failures occurring near the gun. One should NEVER connect an un-shrouded hose directly to a water blasting gun. ALWAYS connect a whip hose and safety shroud to the gun first then connect the appropriate hose to the other end of the shroud/whip hose with a quick coupling. The **Aqua Energy Safety Shroud** features a nitrile outer cover which is water, oil and soil resistant. The inner material consists of high strength braided stainless steel. The 2759 bar (40,000 psi) shrouds also include a layer of woven Kevlar™ for superior strength.
